

Find out where their spouses (whom they likely abuse) work. Find out where their children attend school. Share this information with your fellow patriots. The Republic is nearly dead. The generators for the life support machines are Bingo fuel. If you do not take action now you will see the death of the Republic before the next generation takes power. Is it illegal to dox a cop? It might be. Was it illegal under British law for minutemen to fire on His Majesty's forces? It sure was. Patriots fought. Patriots will fight. You can lie on your back and continue to wilfully accept the long cock of justice or you can resist. Will you be a sheep or a sheepdog? It's your call.

That is a very weak police department.

They're childish amateurs. I'm embarrassed for them. Shameful.

The Supreme Court has ruled that law enforcement can't search digital evidence (phones, cameras, HD cards, etc.) without a warrant. (Riley v California, 2014)

You guys need to start coordinating offline. Assume your channels are being watched. Assume your phone is being bugged. The American revolution was first coordinated in public houses, taverns, churches, and in the homes of patriots. We need to organize a resistance (without violence) and each take action wherever we are. Write the governor. Write the head of the TX Rangers. But take action in your community too. Film the Police. Do not let up. When you find corrupt officers make them known. Make their houses known. Find out where their spouses (whom they likely abuse) work. Find out where their children attend school. Share this information with your fellow patriots. The Republic is nearly dead. The generators for the life support machines are Bingo fuel. If you do not take action now you will see the death of the Republic before the next generation takes

johnny five o I would like to personally thank the person who gave out this pigs address. He deserves way worse (the pig does). To that person who gave out the address you have my admiration and respect. Make sure that you melt down which ever medium ( hard drive) you used. No Corpus Delecti. Sir once again much respect you are the best. Roast these Redcoats (Now Blue Coats). If Hillary can melt down hard drives and info storage mediums so can we. Also remember never use your own IP address.

Bring your sidearm for protection. EVERY American has the right to defend themselves. Let a tyrant cop get out of hand. Fear for your life and execute. The chief is already a marked man, he'll get what's coming to him.
